*Thanks to twenty-five years' experience in herbal medicine and the scientific management of Professor Giuseppe Mazzocco (Sport and Exercise Sciences - University of Padua), we formulated the **Mei** rituals: a unique level of effectiveness and comprehensiveness. More and more people are looking for reliable results and these innovative rituals and the **Mei** herbal products, have become indispensable, not only for wellbeing, but also for the maintenance of good health, as they are backed up by scientific research and experiments conducted by **the WFA - Wellness from Feet Academy directed by Prof. Giuseppe Mazzocco** himself.*

*This is the philosophy of scientific wellbeing, which is at the core of the Mei rituals and includes a specialised aromatherapy using essential oils extracted from wild plants and herbal teas, specifically chosen to enhance the power of massage with the **Podostrigiles®**: the unique patented tool that recreates the features of the "strigil", used in ancient Roman baths, and that ensures a deeper and more focused result. In addition, the feeling of wellbeing generated by the rituals can be enhanced and extended by using the appropriate natural products also at home, as recommended by the therapist, trained according to the WFA standards.*
